

# COVID-19 Pandemic: Indus Health Plus launches Hand Sanitizer

May 16, 2020

**Pune:** Indus Health Plus – a pioneer in preventive healthcare has launched hand sanitizer liquid “Indus”. The company has introduced hand sanitizer to meet urgent consumer needs. The product is based on WHO-recommended formulation that kills 99.9% of germs and bacteria without water in various SKU: gap due to a shortage of supply.

The product is aimed at consumers, organizations, and institutions to ensure safety and prevention from the virus. As organizations are planning to continue their operations gradually (as per the Govt. guidelines) there will be a surge in hand sanitizer demand.

**Mr. Amol Naikawadi, Joint Managing Director, Indus Health Plus,** said, “We have observed that there is a massive demand for hand sanitizers which has an alcohol content of 80% and above in the market. And, once, organizations will kick start their offices, the demand gap will become much wider. As a preventive healthcare organization, it is our responsibility to extend our full support during this dreadful situation. Therefore, we launched this essential product to provide an economical solution with the utmost quality to organizations and various other businesses for the safety of their employees at this crucial time.”

The hand sanitizers will be available across the country in different packaging with affordable pricing.

Pack Size	100 ml	200 ml	500 ml	1 litre	5 litres	10 litres
